

# FlexCart™ Products Catalogue

FlexCart Company designs Six Sigma based cart systems for maintenance professionals. Our first product, the FlexCart FC-100 Engineering Cart was the result of a two-year partnership with three major facilities companies to develop the most functional and efficient engineering cart possible. This cart is now in service with thousands of maintenance professionals across North America and enjoys a 100% satisfaction rating. Since the FC-100, FlexCart has developed 8 additional carts and other products designed to serve the needs of nearly all types of facilities maintenance professionals.

## All of our carts include the following features:

- Narrow, light and very maneuverable.
- Manageable size with lots of storage space.
- Quiet, durable, nonmarring, lockable wheels.
- Locks completely with provided pad locks.
- Padded drawers and fabric tool holders provide quiet operation.
- Durable metal construction.
- Removable trash bin.
- Built-in vise clamp.
- Labeled pockets allow tools to be tracked.
- Drawers come with parts organizing bins.
- Includes our tool bag carried in the handle.
- A ladder hook carries up to a 6' ladder.
- Fabric pocket panel on the side provides a large storage area for a multitude of items.
- Two large storage areas on the bottom.
- Dimensions: 14.5" W x 37.5" L x 45" H
- All carts available with or without tools.

## FC-100 - Engineering Cart

This is our original, award winning, stainless steel engineering cart. In addition to the above features this cart also includes a locking front tool compartment that comes complete with labeled fabric tool holders designed to carry the larger, standard tools typically needed by most engineers. **This cart, as well as our others, has been proven to increase the productivity of the engineer using it by an average of 40%.**

FC-100WT (With tools): Grainger#: 35XR82

FC-100NT (No tools): Grainger#: 35XR83

**Currently in stock.**

## FC-100CS

This cart has features that are exactly the same as our original FC-100 cart above except it is made of all powder-coated carbon steel. It features a very attractive silver coating in place of the stainless steel and provides all of the functionality at a lower price point.

FC-100CSWT (With tools)

FC-100CSNT (No tools)

**Available June 2018.**

Grainger part numbers coming soon.

## FC-200 - Tradesmen's Cart

This cart includes all of the features listed above. The FC-200 is the same size as the FC-100. The only difference is that the front tool compartment has been removed and the drawers widened to fill in the space. The FC-200 is a great, all-purpose cart design that works well for general maintenance, tradespeople and special purposes. It includes heavy duty drawer slides on the 3 and 4" drawers to handle tougher applications.

FC-200WAT (With all tools)

FC-200WBT (With tool bag tools)

FC-200NT (No tools)

**Currently in stock.**

Available through Grainger Sourcing. Grainger part numbers coming soon.

## FC-300 Painter's and Large Equip. Cart

This cart has the same structure as the FC-200 except the bottom 4 drawers have been removed and this area is covered by two large locking doors. The FC-300 is sold in 2 models: First, a Painter's cart. In this configuration the large cabinet area accommodates two 5-gallon paint buckets or up to eight 1-gallon cans and the tool bag is replaced by a special storage bin. In the 2<sup>nd</sup> configuration (shown in the photo) the tool bag is provided and the storage area is used to store and transport larger pieces of equipment. **Painter's Cart:**

FC-300PCWT (With painter's tools)

FC-300PCNT (No tools)

### **Large Equipment:**

FC-300LEWBT (With tool bag tools)

FC-300LENT (No tools)

### **Available May 2018.**

Grainger part numbers coming soon.

## FC-400 Painter's and Large Equip. Cart

This cart is very similar to the FC-300 above except the storage cabinet is smaller allowing room for four drawers instead of three, adding a 4" drawer just above the cabinet. The FC-400PC provides another option to professional painters who use gallon cans instead of 5-gallon buckets. This cart can carry more than eight 1-gallon cans. Just like the FC-300, the FC-400LE is also designed for technicians who need to carry larger pieces of equipment such as Carpenters, Bio-Med, locksmiths, IT and others. The FC-400LBC is set up as a light bulb cart. In this model the tool bag is removed and the space inside of the handle is redesigned to carry a large box of 4' lightbulbs. Additionally a ladder is carried on the front. There is also ample room for other bulbs, ballasts and lighting parts in the drawers, cabinet and fabric pockets.

### **Painter's Cart:**

FC-400PCWT (With Painter's tools)

FC-400PCNT (No tools)

### **Multi-Purpose Cart:**

FC-400WAT (No all tools)

FC-400WBT (With tool bag tools)

FC-400NT (No tools)

### **Light Bulb Cart:**

FC-400LBC (No tools)

### **All Currently in stock.**

Available through Grainger Sourcing. Grainger part numbers coming soon.

## FC-50 FlexKit™

The FlexKit is a small, suitcase sized, light-weight, quick call engineering cart that was designed with significant input from hundreds of engineering professionals across North America. It was designed to deliver as many of the features and functions of our award winning FlexCart Engineering Cart as possible while maintaining a small, very portable size that is easily carried up-stairs and loaded into the back of a golf car or other vehicle. It features a light-weight aluminum body with three specially designed, patent pending parts boxes. The FlexKit has durable 4" wheels with precision bearings, a light-weight, but strong extendable handle, A locking tool bag cover, a locking system for the parts boxes and a pre-attached cable for securing the entire cart in a particular location. The top of the cart accommodates our very popular FlexCart Tool Bag. Around the outside of the FlexKit pockets are situated that are sized to carry commonly needed larger tools. It also includes two hooks on the front for carrying a 2' step ladder and it includes an integrated CleanCase Hidden Plunger™ carrier. Its dimensions are: 14" x 16" x 24".

FC-50NT (No tool bag or tools)

FC-50WTNT (With tool bag, no tools)

FC-50WT (With tool bag and tools) (shown in photo.)

**Currently In Stock.** Available through Grainger Sourcing.

## CleanCase Hidden Plunger™.

We have spent thousands of hours talking with Engineers about their work. One of the most commonly discussed issues is the uncomfortable nature of transporting a plunger through their facility, which is generally done either in a bucket or a trash bag. In both of these cases it is obvious to the patient, guest or tenant what the Engineer is carrying and as a result causes an uncomfortable situation for them and the Engineer. The CleanCase Hidden Plunger™ is a brand new approach to the plunger and how it is carried and used in a facility environment. It disguises the plunger in a special case and allows it to be carried through the facility without anyone knowing what it is. It also carries the plunger in a more sanitary manner, first by covering the plunger head with a special plastic bag and then by encasing it in a patent pending case with a handle on top. The CleanCase comes with 30 plunger head bags, which are also available for purchase separately. The included plunger tool is also innovatively designed to be a more professional, better functioning tool. It has a high-quality plunging head and a unique padded, ergonomic handle that extends to a length of 25" (normal handles are 17") keeping the operator back and away from the problem they are addressing.
