

# Engineering Cart

Imagine your engineers getting 40% more done in the same amount of time.  
*FlexCart makes this possible!*

*The FlexCart Engineering Cart is the result of a two year partnership with major hotel and facilities companies to develop the most functional and efficient engineering maintenance cart possible. Designed and tested by facilities maintenance professionals from the ground up, FlexCart was uniquely built to deliver the exact functionality needed by the engineer in a durable, compact and lightweight design. Now in service with hundreds of engineering departments across North America, FlexCart through its Six Sigma design has proven to deliver valuable benefits including:*

- **Getting More Done!**

*Our customers tell us that their engineers are getting an average of 40% more work done when they use the FlexCart.*

- **Keeping Track of Tools and Parts**

*FlexCart's labeled tool pockets and parts bins provide easy tracking of these items. Lost tools and wasted time walking back to the shop are greatly reduced.*

- **Increased Professionalism**

*FlexCart is a leap forward in engineering professionalism that your staff will love and your customers will find equally impressive.*

- **Establishes a Powerful Standard**

*When you standardize around the best possible way of performing a task, great new efficiencies come to your organization. FlexCart is that kind of standard.*

- **Receive a Great ROI!**

*FlexCart has been proven to pay for itself in just a few months and then continues to save your property(ies) money year after year.*

Patent(s) Pending

# Cart Features

- **Light Weight**
- **Narrow Width: 14" Wide**
- **Easy to Maneuver**
- **Locks up securely with three padlocks (included).**

## ON THE RIGHT SIDE (NOT SHOWN)

### 3 Large Utility Pockets

- Holds spray bottles, rags, knee pads and other

### Fluorescent Light Tube Storage

- Holds T4, T8 and T12 light tubes

### HVAC Filter Storage

- Holds small to large filters

### Ladder Hook

- On the front of tool storage door
- Holds up to a 6' ladder

### Lockable Tool Storage Area

- Labeled pockets provide quick tool inventory
- Removable tool panels allow you to change the tools being carried in this area

### Lockable 5" Front Casters

- Heavy duty steel
- Rolls easily on carpet
- Non-marring
- Precision bearings

### Large Work Surface with Sides

- Side folds down to extend the work surface
- When side is up creates a large bin for transporting parts

### Welded Unibody Steel Frame

- For long-lasting durability

### Vacuum or Large Item Storage Area

- Designed to hold most compact vacuum styles

### Lockable Tool Bag Cover

### Vise Clamp

### Removable Tool Bag

- Contains 84 of the most commonly needed tools
- Labeled pockets provide tool accountability
- Sits in special carrier built into handle

### 7 Lockable Drawers

- 12 sq ft of organized storage space
- Customizable parts bins
- Can hold hundreds of different parts
- Stainless steel fronts

### Large Trash Receptacle

- Removable

### Large Item Storage Area

- Behind trash can
- Holds gallon paint can and other tall containers

### Heavy Duty 8" Wheels

- Non-marring
- Rolls easily on carpet
- Precision bearings
